

Better than a cleaning  
product.  
**Millions of allies!**

By cleaning with the PolVita® range, you apply millions of beneficial bacteria to your environment. These will quickly multiply and create a natural barrier on the surfaces: this is called a natural protective microflora.

**Probiotic cleaning that  
protects.**

# The probiotic cycle

Better than just cleaning.  
14 days of intense effort!

*\*No need to change your working methods! Simply replace your regular cleansers with protective probiotic cleansers.*

## Scientifically proven effectiveness

Better than promises. Certainties!

Genetic identity established

Minimum 14 days of bacteriological activity on surfaces

92% of organic dirt digested in just 3 days

Production of a natural protective barrier on all surfaces

Our in-house R&D laboratory in collaboration with:
