# POL Tech SS 50

## Powerful solvent-based cleaner to remove mineral grease

### DESCRIPTION

A powerful solvent-based cleaning agent for use on mineral dirt, hardened and thick layers of grease. Suitable for the cleaning of floors and concrete surfaces.

### USE

Soaking and impregnation of surfaces with the solution at the recommended dosage with cleaning mechanical action (auto scrubber low and high pressure).
Can also be used directly in scrubber-dryer. The machine devices will have to be selected according to the floor type (discs or brushes).

### DOSAGE

- General use: 2.5% (1L/40L).
- Accumulated or hard fat: 20% (1L/5L).
- Working clothing dipping prewash: 2.5% (1L/40L).

### TECHNICAL CHARACTERISTICS

- Color: green
- Pure pH: 12,0 ±0,5
- When applying the product using high-pressure systems, it is always recommended that you soak or saturate surfaces with a solution of the product beforehand using a sprayer and that you use the high-pressure system for physical cleaning purposes, using water only (and no product).
- Likewise it is advised – especially if you are carrying out extensive cleaning using an automated cleaning machine – that you soak surfaces in order to get a sufficiently long product-surface contact time and thus obtain optimal results.

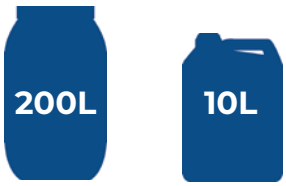
### STORAGE

Store the product in its closed original packaging. Protect against freezing temperatures.

### ECOLOGICAL INFORMATION

- Biodegradable product (CE 648/2004)
- Packaging 100% recyclable

### PACKAGING



| Packaging | Reference | EAN code |
|---|---|---|
| Drum 200 liters | 2200195 | 05411283229517 |
| Can 10 liters | 2200123 | 05411283222310 |
